EXPERIENCE

Project Trainee

Bhabha Atomic Research Center(BARC), Chembur   June 2023 - July 2023

- Implementation of SCADA Configuration GUI. In this internship, we worked on the project to create a user interface for the SCADA system that allows supervision and control of plants, both locally and remotely.

PROJECTS

Realtime Exercise Tracker   July 2022 - December 2022

This was our group mini project in Semester-6. In this project , instruction are given to the user on which exercise to execute, but also on how to hold themselves correctly and utilize computer vision to count the repetitions and also offers real time posture detection

Library Management System   January 2022 - May 2022

This was our group mini project in Semester-4. We made a library management system using HTML & CSS for front-end and for backend we use MySQL & PHP. Our aim was to provide all kinds of books to users/customers who have logged-in to our web page. User can download and read the books

Voice Assistant   July 2021 - December 2021

This was our group mini project in Semester-3. We made a voice assistant using python which can perform various functions like whenever we start a voice assistant it will wish according to time and it can open various applications from our folder by just saying like Microsoft teams, vscode, Spotify. WhatsApp etc.
